SUMMARY

Full-Stack Engineer with 2+ years of professional experience shipping production systems across AI and blockchain domains. Owns full delivery cycles — from system architecture to AWS deployment — using Node.js, Go, React/Next.js, and Python. Comfortable working remotely with minimal supervision across multiple concurrent projects.

EDUCATION

BSc in Software Engineering

Sep 2023 – May 2027

Addis Ababa Science and Technology University (AASTU), Addis Ababa, Ethiopia

- Relevant Coursework: System Design, Data Structures & Algorithms, Computer Networking, Database Systems, Operating Systems.

EXPERIENCE

Full-Stack Developer — Eagle Point AI

Dec 2025 – Present

- Engineered full-stack AI training applications in Python, Go, and Node, designed to model senior-level engineering reasoning and decision-making for AI training pipelines.
- Owned all architectural decisions across 10+ projects, producing detailed technical documentation for every system design choice.
- Delivered production-ready features across 4+ distinct tech stacks simultaneously in a fully remote environment, meeting all project deadlines independently.

Intern Web Developer — Pixel Addis Solutions

June 2025 – Dec 2025

- Developed and shipped 4+ responsive pages for a production platform using React.js and Tailwind CSS, achieving consistent rendering across all major browsers and devices.
- Took ownership of 5 backend features in node within first 2 months — contributing directly to production codebase alongside senior engineers.

Software Development Mentor — Skill Spectrum – AASTU

Mar 2024 – Jun 2024

- Trained 20+ junior developers across 6-month program covering HTML, CSS, JS/TS, React, and Node.js — achieving 30% higher cohort project completion vs. prior cohort.

PROJECTS

Deso Domains — Blockchain Domain Auction Platform [🔗 live](#)

- Architected and launched a production domain auction platform on the Deso blockchain — supporting real-time transfers and extensible auction flows.
- Backend: Node.js/Express, PostgreSQL, Redis caching, BullMQ async jobs, full Deso API integration. Frontend: Next.js, Tailwind CSS.
- Infrastructure: Dockerized, deployed on AWS EC2 with Nginx reverse proxy, automated CI/CD via GitHub Actions.

Task-Flows — Multi-Role Project Management Platform

- Designed a three-surface platform — Admin (Vite/React), User app (Next.js), shared Express REST API — with full RBAC, Docker containerization, and AWS EC2 deployment.

Business Directory — Cross-Platform Mobile App

- Developed a React Native app enabling local business discovery, contact lookup, and owner self-service listing management across iOS and Android.

TECHNICAL SKILLS

Languages: JavaScript / TypeScript, Go, Python, SQL

Frontend: Next.js, React, React Native, Tailwind CSS

Backend: Node.js / Express, Go, Python / FastAPI, REST APIs

Databases: PostgreSQL, MySQL, Redis, MongoDB

DevOps: Docker, GitHub Actions (CI/CD), AWS EC2, Nginx, Kubernetes, Linux

Blockchain: Deso integration

ACHIEVEMENTS & ACTIVITIES

- Shipped a live, publicly accessible blockchain platform (DeSo Domains) while completing final year of BSc — demonstrating production-level ownership as a student.
- Mentored 20+ developers at AASTU through Skill Spectrum, contributing directly to the university's developer community.
- Gained professional experience across 3 companies before graduating — Eagle Point AI, Zero Labs, and Pixel Addis Solutions.
- Achieved 4.0 GPA in the first year — ranked among top performers in the Software Engineering cohort at AASTU.
